DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 03/13/09 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1, 2, 4, 5, 9, 10, 12-27, 30-40 and 51-60 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

4. In independent claims 1 and 27, support could not be found for the claims as amended. For instance, no support could be found for the range of "up to 20% by weight" with respect to the ethylene vinyl acetate (EVA). While applicant pointed to paragraph [0050] for such support, the Examiner was unable to find such support. To the extent that the passage relied on by

applicant discloses 19.35 % EVA, this teaching does not support the claimed range of "up to 20% by weight," as presently claimed. Accordingly, this limitation is considered to constitute new matter.

5. Additionally, support could not be found for the newly added limitation that the phase change material comprises "paraffin wax, a synthetic wax, or equivalents thereof." The Examiner was unable to find, and applicant failed to point out, such support in the originally filed specification. Therefore, this limitation is considered to constitute new matter.
